

BTC

WHITEPAPER

BSC.

www.bitcoinbsc.io

INTRODUCTION:

Bitcoin BSC is an innovative fusion of the historic value of Bitcoin and the cutting-edge BNB Smart Chain. By offering an eco-friendly staking mechanism that encourages long-term holding and community involvement, Bitcoin BSC aims to change the way we perceive token-based rewards.

Bitcoin BSC is a BEP-20 token built on BNB Smart Chain (BSC), reimagining Bitcoin with a focus on staking. Instead of conventional mining, holders of \$BTCBSC can earn passive income through staking, with the rewards scaled to the number of tokens staked and tied to Bitcoin's original block reward mechanism.

THE GENESIS:

Reflecting the nostalgia of Bitcoin's early days, Bitcoin BSC is configured to the price and supply of Bitcoin in April 2011. This aligns with a time when 6,125,000 bitcoins were pegged at \$0.99. The choice to start at 99¢ ensures market accessibility and positions Bitcoin BSC favorably on the BSC network.

WHY BNB SMART CHAIN (BSC)?

- **Familiar Architecture:** BNB Smart Chain adopts the same foundational code as Ethereum, ensuring robust security and efficient smart contract execution.
- **Cost-Effective & Swift:** BSC significantly reduces gas fees and offers faster transaction speeds than Ethereum.
- **Ease of Access:** BEP-20 tokens like \$BTCBSC are seamlessly accessible via popular dapps like Trust Wallet and MetaMask.

TOKENOMICS:

- Total Supply: 21,000,000
- Presale Supply: 6,125,000
- Soft Cap: 4,000,000 tokens
- Hard Cap: 6,125,000 tokens
- Network: BNB Smart Chain
- Token Type: BEP-20
- Token Name: BTCBSC
- Minimum Purchase: \$10

THE PRESALE COMPRISES TWO PHASES:

- **Initial Phase (Soft Cap):** 4 million \$BTCBSC tokens will be available at 99¢, mirroring Bitcoin's 2011 price.
- **Secondary Phase:** An additional 2.125 million tokens will be on sale at the same rate to achieve the Hard Cap.

All unsold tokens post-listing will contribute to the Bitcoin BSC staking contract, guaranteeing a fixed total supply of 21 million \$BTCBSC tokens.

STAKING AND APY:

Bitcoin BSC's Stake-to-Earn model offers an eco-friendly alternative to Bitcoin's Proof-of-Work. The token release mirrors Bitcoin's estimated 120-year schedule and its block confirmations since April 2011. The rewards from staking are directly proportional to a member's share in the staking pool and the current APY. This model encourages a decentralized and engaged community, ensuring consistent growth in the token ecosystem.

ROADMAP:

Bitcoin BSC takes its major inspiration from Bitcoin, the first peer-to-peer cryptocurrency that started a new economy outside the traditional financial world. We aim to improve on this ideal with the hard-coded promise of passive income rewards through a trusted Stake-to-Earn mechanism. Bitcoin BSC aims to redefine the way we look at Bitcoin by focusing on what works, whilst taking a low fee and environment-friendly approach to benefit all holders.

STAGE 1: PRESALE STARTS

To give everybody the chance to acquire \$BTCBSC at the lowest price, 29% of the total token supply will be available to swap for an equivalent value of \$0.99. Funds raised will be used to cover development and marketing costs.

STAGE 2: STAKING OPENS

Staking is the cornerstone of the Bitcoin BSC project. An audited and verified smart contract will be deployed and activated during the presale stage, encouraging early staking participation.

STAGE 3: TOKEN LAUNCH

\$BTCBSC is set to launch on a BNB Smart Chain DEX. With 2% of the supply allocated to locked DEX liquidity, LP is also required to ensure a fully decentralized and community-owned project.

STAGE 4: PASSIVE REWARDS

\$BTCBSC holders can stake their tokens and get paid out daily. Rewards accrue every 10 minutes, simulating the block schedule of Bitcoin. The maximum supply will be reached in about 120 years.

SWAP AND CLAIM:

\$BTCBSC can be acquired from the official website Bitcoinbsc.io with payment options including ETH or USDT (ERC-20), BNB or USDT (BEP-20), or Card via Wert. Two separate presale contracts will be available: one for ETH and the other for BNB. Post-presale, all ETH contract purchases will be transferred to the BNB presale contract. Token claims will be through the BSC network. If purchasing with ETH, BNB will still be needed for gas during claiming.

CONCLUSION:

Bitcoin BSC seeks to rewrite history by integrating the charm of early Bitcoin with the innovation of BNB Smart Chain. Through strategic pricing, a commitment to sustainability, and a robust staking mechanism, Bitcoin BSC invites the community to partake in a revolutionary journey.
